

**Datasheet**

Subject to technical alteration  
Issue date: 20.08.2019 • A100

**» APPLICATION**

The brightness sensor for ceiling installations detects indoor and outdoor light levels in living rooms, offices or at workplaces depending on the type of prism. The sensor is adapted to the spectral sensitivity of the human eye and serves together with control systems for an on-demand light or sun protection control. The remote sensor is connected to the enclosure via conventional RJ45 cables, making it easy to install in hardly accessible places. If two sensors are used, the individual values, the mean, minimum or maximum value can be provided through both output signals (configurable via Thermokon USEapp). Together with the relay option, two 2-point controllers or a 2-stage controller can be realized.

**» TYPES AVAILABLE****Ceiling sensor light – active 0..10 V | 4..20 mA | Relay**

LDF+ V L1500 straight prism  
LDF+ V L1500 diagonal prism  
LDF+ A L1500 straight prism  
LDF+ A L1500 diagonal prism

LDF+ V L1500 straight prism Relay  
LDF+ V L1500 diagonal prism Relay

**Dual ceiling sensor light – active 2x 0..10 V | 2x 4..20 mA | Relay**

LDF+ Dual VV 2xL1500 straight prism  
LDF+ Dual VV 2xL1500 diagonal prism  
LDF+ Dual AA 2xL1500 straight prism  
LDF+ Dual AA 2xL1500 diagonal prism

LDF+ Dual VV 2xL1500 straight prism Relay  
LDF+ Dual VV 2xL1500 diagonal prism Relay

## » SECURITY ADVICE – CAUTION

The installation and assembly of electrical equipment should only be performed by authorized personnel.

The product should only be used for the intended application. Unauthorised modifications are prohibited! The product must not be used in relation with any equipment that in case of a failure may threaten, directly or indirectly, human health or life or result in danger to human beings, animals or assets. Ensure all power is disconnected before installing. Do not connect to live/operating equipment.

Please comply with

- Local laws, health & safety regulations, technical standards and regulations
- Condition of the device at the time of installation, to ensure safe installation
- This data sheet and installation manual

## » NOTES ON DISPOSAL

As a component of a large-scale fixed installation, Thermokon products are intended to be used permanently as part of a building or a structure at a pre-defined and dedicated location, hence the Waste Electrical and Electronic Act (WEEE) is not applicable. However, most of the products may contain valuable materials that should be recycled and not disposed of as domestic waste. Please note the relevant regulations for local disposal.

## » CONFIGURATION

**The Thermokon bluetooth dongle with micro-USB is required for communication between USEapp and USE-M / USE L (Item No.: 668262). Commercial bluetooth dongles are not compatible.**

Application-specific reconfiguration of the devices can be performed using the Thermokon USEapp. The configuration can be performed only when the device is powered.

**The configuration-app and the app description can be found in the Google Play Store or in the Apple App Store.**

## » APPLICATION NOTICE

The housing cover must be completely closed in order to ensure the accuracy and reproducibility of the measured values during a test or service log via USEapp.

The Bluetooth dongle snaps into the socket easily. When removing, please fix the plug-in card (option PCB) so that it is not unintentionally pulled out.

## » MOUNTING ADVICES

The ceiling flush mounted sensor is installed in a 26 mm diameter hole.

It is important to mount the light sensor in a suitable position for daylight regulation.

It should be positioned where an average daylight level will be reached. (center of the room or in the vicinity of the light control to be measured). The sensor should not be positioned too close to window surfaces or too far in the room. Ideally, the sensor should be positioned over the measuring surface, such as the work surface of a desk. In contrast to the straight prism, the version with oblique prism can be individually positioned in the room. The measurement area should preferably have a medium reflectance. Reflecting objects such as glass or polished metal surfaces should not be present. The influence of extraneous light sources, eg lights, windows, skylights must be excluded or reduced as much as possible.

» **TECHNICAL DATA**

<b>Measuring values</b>	light	
<b>Output voltage</b>	1x/2x 0..10 V or 0..5 V (adjustable via jumper; live-zero configuration via Thermokon USEapp), min. load 10 kΩ	
<b>Output ampere (type-dependent)</b>	<b>A   AA</b> 1x/2x 4..20 mA, max. load 500 Ω	
<b>Output switch contact (type-dependent)</b>	<b>Relay</b> 2x floating contact NO for 24 V ~ or 24 V = / 3 A, (optional)	
<b>Power supply</b>	15..35 V = or 19..29 V ~ SELV	
<b>Power consumption</b>	typ. 0,6 W (24 V =)   1,5 VA (24 V ~)	
<b>Measuring range light</b>	0..200 Lux   0..1000 Lux (default)   0..2 kLux   0..10 kLux   0..20 kLux   0..50 kLux, selectable at the device	
<b>Accuracy light</b>	±5% of measuring range	
<b>Sensor</b>	Ambient light sensor with precise optical filtering similar to the human eye	
<b>Prism (optional)</b>	acrylic glass clear, straight	acrylic glass clear, diagonal
<b>Enclosure</b>	enclosure USE-M, PC, pure white	
<b>Protection</b>	IP65 according to EN 60529	
<b>Cable entry</b>	<b>V(V)   A(A)</b> M20 for wire max. Ø=8 mm incl. seal insert for double cable entry for wire max Ø=6 mm	<b>Relay</b> M25 with fourfold cable entry for wire with max. Ø=7 mm, removable
<b>Connection electrical</b>	removable plug-in terminal, max. 2,5 mm², sensor wire length=1,5 m (default), max. 10 m, plug RJ45	
<b>Ambient condition</b>	-30..+70 °C, max. 85% rH short term condensation	

» **PRODUCT TESTING AND CERTIFICATION**

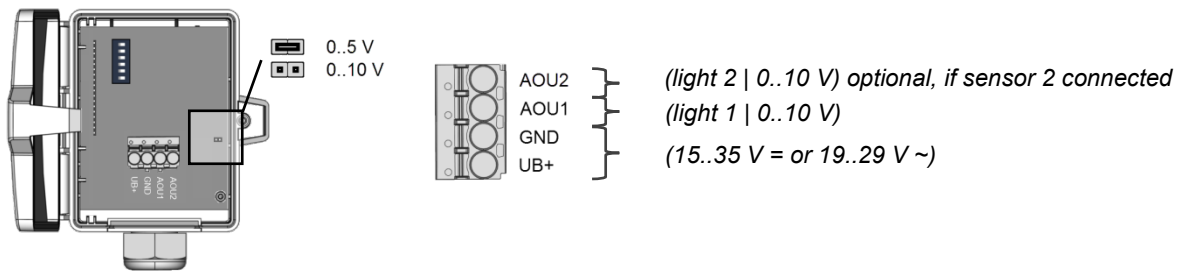

**Declaration of conformity**

The declaration of conformity of the products can be found on our website <https://www.thermokon.de/>.

» **CONNECTION PLAN**

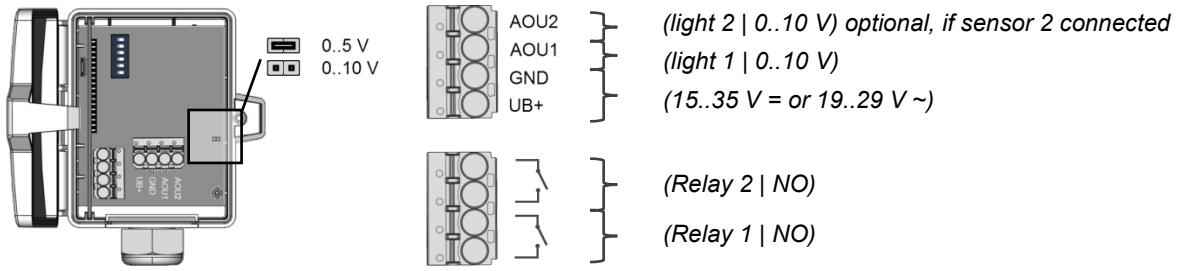

LDF+ V | optional LDF+ Dual VV

LDF+ A | optional LDF+ Dual AA

LDF+ V Relais | optional LDF+ Dual VV Relais

» APPLICATION

Two RJ45 sockets are integrated, instead of permanently connected cables. This allows 2 light sensors to be connected with a shielded RJ45 cable of up to 10 m in length. The user can independently extend the basic versions with one light sensor (LDF + V | LDF + A) with a second light sensor.

To properly detect the sensors, they must be connected before the unit is powered up.

» DIP SWITCH CONFIGURATION

Measuring range - DIP 1..3

<p><b>#0 (factory default)</b> SI = 0..1 kLux IMP = 0..100 fc</p>	<p><b>#1</b> SI = 0..0,2 kLux IMP = 0..20 fc</p>
<p><b>#2</b> SI = 0..2 kLux IMP = 0..200 fc</p>	<p><b>#3</b> SI = 0..10 kLux IMP = 0..1000 fc</p>
<p><b>#4</b> SI = 0..20 kLux IMP = 0..2000 fc</p>	<p><b>#5</b> SI = 0..50 kLux IMP = 0..5000 fc</p>

DIP 4, 5

» **ANGLE-DEPENDENT SENSITIVITY**

**Sensitivity straight prism**

**Sensitivity diagonal prism**

## » SPECTRAL SENSITIVITY

— Human Eye  
— LDF+

The adjacent graph shows the sensitivity curve of the human eye - also known as the V-lambda curve - and the spectral sensitivity of an LDF + sensor. The human eye perceives radiation of about 400 to 700nm as light. At about 555nm, the eye is most sensitive.

## » DIMENSIONS (MM)

## » ACCESSORIES (INCLUDED IN DELIVERY)

Mounting base  
 Mounting kit universal  
 • Cover screw + screw cover • 2 Rawlplugs • 2 Screws (countersunk head) • 2 Screws (rounded head)

Item No. 631228  
 Item No. 698511

## » ACCESSORIES (OPTIONAL)

Bluetooth dongle  
 Cable entry M25 USE white, sealing insert 4x Ø=7 mm (4 pcs)

Item No. 668262  
 Item No. 641364
