Contact temperature sensor

Datasheet

Subject to technical alteration Issue date: 28.06.2017

Application

Sensor with hinged lid enclosure USE for temperature measurement of pipes and round surfaces. Spring loaded brass contact sensor.

Types Available

Contact sensors with display temperature - active 0..10 V | 4..20 mA | relay

VFG54+ LCD TRV MultiRange

VFG54+ LCD TRA MultiRange

VFG54+ LCD TRV MultiRange Relay

Security Advice – Caution

The installation and assembly of electrical equipment should only be performed by authorized personnel.

The product should only be used for the intended application. Unauthorised modifications are prohibited! The product must not be used in relation with any equipment that in case of a failure may threaten, directly or indirectly, human health or life or result in danger to human beings, animals or assets. Ensure all power is disconnected before installing. Do not connect to live/operating equipment.

Please comply with

- Local laws, health & safety regulations, technical standards and regulations
- Condition of the device at the time of installation, to ensure safe installation
- This data sheet and installation manual

Notes on Disposal

As a component of a large-scale fixed installation, Thermokon products are intended to be used permanently as part of a building or a structure at a pre-defined and dedicated location, hence the Waste Electrical and Electronic Act (WEEE) is not applicable. However, most of the products may contain valuable materials that should be recycled and not disposed of as domestic waste. Please note the relevant regulations for local disposal.

Build-up of Self-Heating by Electrical Dissipative Power

Temperature sensors with electronic components always have a dissipative power, which affects the temperature measurement of the ambient air. The dissipation in active temperature sensors shows a linear increase with rising operating voltage. This dissipative power has to be considered when measuring temperature. In case of a fixed operating voltage (\pm 0,2 V) this is normally done by adding or reducing a constant offset value. As Thermokon transducers work with a variable operating voltage, only one operating voltage can be taken into consideration, for reasons of production engineering. Transducers 0..10 V / 4..20 mA have a standard setting at an operating voltage of 24 V =. That means, that at this voltage, the expected measuring error of the output signal will be the least. For other operating voltages, the offset error will be increased by a changing power loss of the sensor electronics. If a re-calibration should become necessary later directly on the sensor, this can be done by means of a trimming potentiometer on the sensor board.

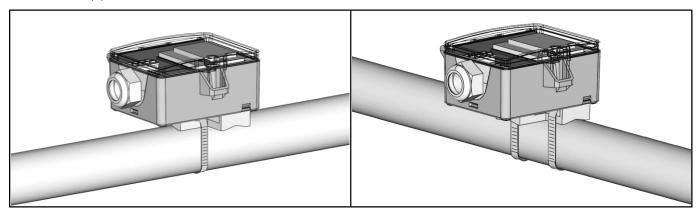

Remark: Occurring draft leads to a better carrying-off of dissipative power at the sensor. Thus temporally limited fluctuations might occur upon temperature measurement.

Technical Data

Measuring values	temperature		
Output voltage	010 V or 05 V, min load 10kΩ		
	(live-zero configuration via Thermokon USEapp)		
Output Amp TI	420 mA, max. load 500Ω		
Output switch contact Re	2 floating contacts for 24 V ~ or 24 V = / 3 A		
Power supply	1535 V = or 1929 V ~,		
ТІ	RA 1535 V =		
Power consumption	max. 2,5 W (24 V =) max. 4,3 VA (24 V ~)		
Measuring range temp.	-20+80 °C (default setting), optionally configured via Thermokon USEapp		
Accuracy temperature	±0,5 K (typ. at 21 °C)		
Display	LCD 29x35 mm with RGB backlight		
Enclosure	enclosure USE-M, PC, pure white, cover PC, transparent, with removable cable		
	entry		
Protection	IP65 according to EN 60529		
Cable entry TRV TI	RA M16, for wire max. Ø=8 mm		
Rei	ay M20, for wire max. Ø=10 mm		
Connection electrical	removeable plug-in terminal, max. 2,5 mm ²		
Pocket	brass, spring loaded sensor		
Ambient condition enclosu	re -35+70 °C, max. 85% rH short term condensation		
Mounting	installation possible in or across the direction of the pipe		

Mounting Advices

The device is fixed using the tightening strap. Use contact fluid for better heat transfer between sensor and measuring medium. To avoid permeation of condensate, mount the sensor on top of the tube, if possible. The installation is possible in or across the direction of the pipe.

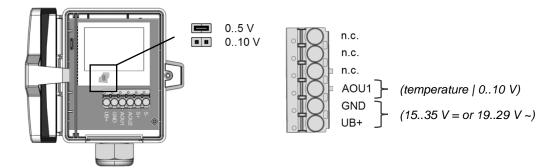

Issue date: 28.06.2017 Page 3 / 4

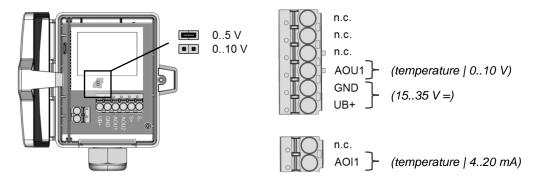

Connection Plan

To change the output voltage range (default 0..10 V to 0..5 V) via jumper, the display must be removed from the board first.

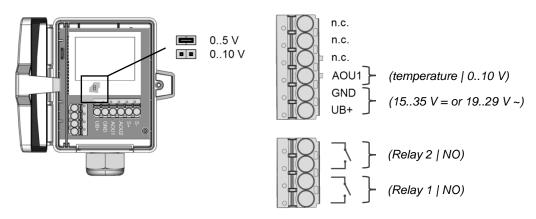

VFG54+ LCD TRV MultiRange

VFG54+ LCD TRA MultiRange

VFG54+ LCD TRV MultiRange Relay

Configuration

The Thermokon bluetooth dongle with micro-USB is required for communication between USEapp and USE-M / USE L (Item No..: 668262). Commercial bluetooth dongles are not compatible.

Application-specific reconfiguration of the devices can be carried out using the Thermokon USEapp. The configuration is carried out in the voltage-supplied state.

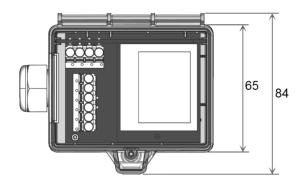

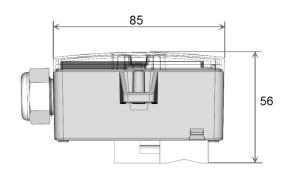

The configuration-app and the app description can be found in the download area of our webpage.

Dimensions (mm)

Accessories (included in delivery)

Mounting kit 2 (only version TRV & TRA)

• Cable entry M16 • Cover screw • 2 Screws (rounded head)

Mounting kit 3 (only version Relay)

• Cable entry M20 • seal insert for double cable entry 2x 6 mm • Cover screw • 2 Screws (rounded head)

Item No. 640503

Item No. 674133

Accessories (optional)

Bluetooth dongle

Tension clamp for pipes Ø up to 110 mm with contact fluid Tension clamp for pipes Ø up to 250 mm with contact fluid Tightening strap PA for pipes Ø up to 100 mm with contact fluid Cable entry M25 USE white, sealing insert 4x Ø=7 mm (4 pcs)

Item No. 668262 Item No. 658911 Item No. 648103 Item No. 668071 Item No. 641364
